

Science: What's that sound? Y4 T1

Learning link

How do we hear sound? How does sound travel? What could we use to make sound?
What is pitch?

Alexander Graham Bell

Alexander was a Scottish inventor, scientist and teacher of the deaf. Famous for making one of the first phones. Both his mother and his wife were deaf and so he felt very connected to the deaf community.

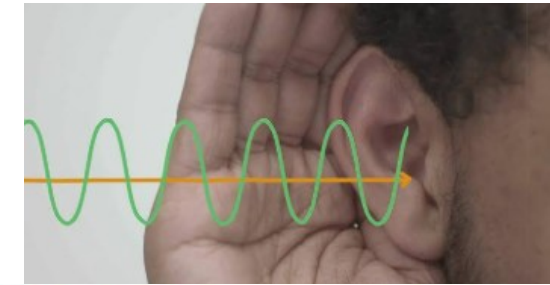

Vocabulary

Sound source	Where the sound is coming from, e.g., a speaker or an instrument.
Pitch	How high or low a sound is in tone.
Vibration	Rapid back and forth movement of an object that creates sound waves.
Volume	How quiet or loud something is.

Practical

Let's make sound! What can we use? How else can we sense sound other than with our ears?
